

## DECLARATION

To whom it may concern,

In light of Philips' recall in 2021 for many of its sleep and respiratory care products, we want to reassure our distributors that Beyond devices are safe to use and are not subject to Philips' recall.

Beyond devices use foam materials that are different from the foam material Philips says are in its recalled machines. Beyond devices use polyETHER which is safety raw materials.

We will continue working closely with our distributors across the American market.
